# DISCLAIMER & FORWARD-LOOKING STATEMENTS

Some of the indicators used by Endeavour in this presentation represent non-IFRS financial measures, including sustaining capital per ounce, non-sustaining capital per ounce, cash cost per ounce, all in sustaining cost per ounce, all in sustaining margin, adjusted EBITDA, adjusted EPS, adjusted net-earnings, net debt, free cash flow, operating cash flow pre-working capital and operating CFPS pre-working capital. These measures are presented as they can provide useful information to assist investors with their evaluation of the pro forma performance. Since the non-IFRS performance measures listed herein do not have any standardized definition prescribed by IFRS, they may not be comparable to similar measures presented by other companies. Accordingly, they are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Please refer to the non-GAAP measures section of the Company's most recently filed Management Discussion and Analysis for a reconciliation of the non-IFRS financial measures used in this presentation.

This presentation contains "forward-looking statements" within the meaning of applicable securities laws. All statements, other than statements of historical fact, are "forward-looking statements", including but not limited to, statements with respect to Endeavour's plans and operating performance, the ability of the Group to achieve its production guidance, AISC guidance, Group non-sustaining capital expenditure outlook, and growth capital expenditure outlook, the estimated exploration expenditures, the ability of Endeavour to meet its 5-year exploration target, the availability of additional dividends and share buybacks, the success of exploration activities, estimated costs incurred in connection with operating activities and capital projects and the timing for updated resources for the Group's mineral properties. All statements, other than statements of historical fact, are "forward-looking statements", including but not limited to, statements with respect to Endeavour's plans and operating performance, the timing and amount of estimated future production, costs of future production, future capital expenditures, the success of exploration activities, the anticipated timing for the payment of a shareholder dividend and statements with respect to future dividends payable to the Company's shareholders, the completion of studies, mine life and any potential extensions, the future price of gold and the share buyback program. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as "expects", "expected", "budgeted", "forecasts", "anticipates", "believes", "plan", "target", "opportunities", "objective", "assume", "intention", "goal", "continue", "estimate", "potential", "strategy", "future", "aim", "may", "will", "can", "could", "would" and similar expressions.

Forward-looking statements, while based on management's reasonable estimates, projections and assumptions at the date the statements are made, are subject to risks and uncertainties that may cause actual results to be materially different from those expressed or implied by such forward-looking statements, including but not limited to: risks related to the successful completion of divestitures; risks related to international operations; risks related to general economic conditions and the impact of credit availability on the timing of cash flows and the values of assets and liabilities based on projected future cash flows; Endeavour's financial results, cash flows and future prospects being consistent with Endeavour expectations in amounts sufficient to permit sustained dividend payments; the completion of studies on the timelines currently expected, and the results of those studies being consistent with Endeavour's current expectations; actual results of current exploration activities; production and cost of sales forecasts for Endeavour meeting expectations; unanticipated

reclamation expenses; changes in project parameters as plans continue to be refined; fluctuations in prices of metals including gold; fluctuations in foreign currency exchange rates; increases in market prices of mining consumables; possible variations in ore reserves, grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; extreme weather events, natural disasters, supply disruptions, power disruptions, accidents, pit wall slides, labour disputes, title disputes, claims and limitations on insurance coverage and other risks of the mining industry; delays in the completion of development or construction activities; changes in national and local government legislation, regulation of mining operations, tax rules and regulations and changes in the administration of laws, policies and practices in the jurisdictions in which Endeavour operates; disputes, litigation, regulatory proceedings and audits; adverse political and economic developments in countries in which Endeavour operates, including but not limited to acts of war, terrorism, sabotage, civil disturbances, non-renewal of key licences by government authorities, or the expropriation or nationalisation of any of Endeavour's property; risks associated with illegal and artisanal mining; adverse community relations or delay in agreeing, implementing or completing resettlement activities and plans; environmental hazards; climate-related physical and transition risks; the availability and performance of emissions-reduction and renewable energy technologies; changes in climate-related disclosure requirements or ESG-related regulation; evolving stakeholder expectations; the reliability and accuracy of ESG-related data (including greenhouse gas emissions estimates, particularly Scope 3 emissions); reliance on third-party information, contractors and suppliers for ESG metrics; and the Company's ability to achieve ESG-related targets or ambitions; and risks associated with new diseases, epidemics and pandemics.

Although Endeavour has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. Please refer to Endeavour's most recent Annual Information Form filed under its profile at [www.sedarplus.ca](http://www.sedarplus.ca) for further information respecting the risks affecting Endeavour and its business.

ESG-related disclosures are inherently subject to measurement uncertainties and methodological limitations. Certain ESG metrics, including greenhouse gas emissions, climate scenario analysis, biodiversity impacts and supply chain data, are based on evolving standards, estimates, assumptions and third-party information, and may not have the same degree of accuracy, comparability or assurance as financial information prepared in accordance with IFRS. As ESG reporting frameworks and regulatory requirements in the United Kingdom and Canada continue to develop, the Company may revise or update its methodologies, baselines or disclosures in future reporting periods.

Brad Rathman, Vice President - Operations of Endeavour Mining plc., a Fellow of the Australasian Institute of Mining and Metallurgy, is a "Qualified Person" as defined by National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101") and has reviewed and approved the technical information in this presentation.

Note: All amounts are in US\$, except where indicated, and may differ from the Management Report due to rounding.

## ESG ratings coverage

## ESG reporting standards

# OUR STRATEGY

Build a resilient business and work as a trusted partner with the ability to reward shareholders

## MAINTAIN A HIGH-QUALITY PORTFOLIO

- Investing in our people
- Delivering industry-leading operational excellence
- Unlocking exploration value
- Active portfolio management

## WORK AS A TRUSTED PARTNER

- Empowering communities
- Boosting local economies
- Protecting the environment
- Promoting ethical business practices

## REWARD SHAREHOLDERS

- Managing our balance sheet prudently
- Competing for capital on a returns basis
- Optimising free cash flow
- Maintaining attractive shareholder returns proposition

# MAINTAINING A HIGH QUALITY PORTFOLIO

Build a resilient business and work as a trusted partner with the ability to reward shareholders

INVESTING  
IN PEOPLE

# OPERATING MODEL PRIORITISING OUR PEOPLE

Geographic focus provides a strong competitive advantage

## INSIGHTS

- › Largest producer in each of our operating countries enhances ability to extract synergies
- › Leading safety performance with a TRIFR of 0.72, which is well below the industry benchmark
- › Hands-on management model with teams close to the operations, 59% West African senior managers and over 95% national employees
- › Streamlined responsibilities aligning core functional expertise under key responsible executive
- › Significant synergies from shared technical functions based in Abidjan
- › Long-standing and trusted stakeholder relationships
- › Airstrips on each site enhance security and ability to share management expertise

OPERATIONAL  
EXCELLENCE

# FULL YEAR 2026 GUIDANCE

Guidance on track with Q4-2026 weighted operational performance

1) All-In Sustaining Cost guidance assumes an average gold price of \$3,000/oz and USD:EUR foreign exchange rate of 0.87

2) Gold price adjusted AISC. YTD realised gold price less \$184/oz impact from the realised gold price of \$4,579/oz versus \$3,000/oz AISC guidance gold price

3) FY-2026 Sustaining Capital Expenditure guidance has been updated from \$230m to \$280m.

OPERATIONAL  
EXCELLENCE

# OPERATIONAL EXCELLENCE

Strong operating performance driving all-in sustaining margin

## Guidance Track Record

□ Production Guidance

● Actual Production

— All-in sustaining margin (%)

**12 years**

Out of last 13 beating or achieving production guidance

**11%**

**Gold Production**

Compound Annual Growth Rate  
("CAGR")

1) 2026E All-In Sustaining Margin based on 30 June 2026 gold price of \$4,008/oz per S&P and mid-point of FY-2026 AISC Guidance range, adjusted for incremental royalties at the higher realised price against the guidance gold price of \$3,000/oz

OPERATIONAL  
EXCELLENCE

# ORGANICALLY GROWING PRODUCTION

Production growth to 1.5Moz with class-leading costs

## Production from continuing operations<sup>1</sup>

Production from continuing operations

1) Continuing operations excludes the discontinued operations of Boungou and Wahgnion which were divested in June 2023, the Karma mine which was divested in March 2022, and the Agbaou mine which was divested in March 2021.

2) Production growth calculated as 1.5Moz versus mid-point of FY-2026 Production Guidance

OPERATIONAL  
EXCELLENCE

# ASSAFOU PROJECT, CÔTE D'IVOIRE

Final investment decision expected by year-end

Assaou processing plant render

## Project timeline

<sup>1</sup> Definitive feasibility study key metrics at \$4,000/oz gold price <sup>2</sup> Excludes Pala Trend 3 deposit. Mineral Resource Estimate effective 31 December 2025. Mineral Reserve Estimate effective 31 December 2025. Mineral Resource and Reserve Estimates follow the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") Definitions Standards for Mineral Resources and Reserves and have been completed in accordance with the Standards of Disclosure for Mineral Projects as defined by National Instrument 43-101. Reported tonnage and grade figures have been rounded from raw estimates to reflect the relative accuracy of the estimate. Minor variations may occur during the addition of rounded numbers. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. Reserves were constrained by MII Pit Shell based on a cut-off grade of 0.40g/t at a \$1,900/oz gold price. Reserves are based on a cut-off grade of 0.40g/t for oxide, laterite and transitional ore and 0.50g/t for fresh ore and \$1,500/oz gold price. <sup>3</sup> The DFS aligns to the NI 43-101 Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") Definition Standards of a Feasibility Study, in line with Endeavour's technical disclosure and reporting requirements. The "Definitive" classification is not a prescriptive classification. The Technical Report was published, within 45 days of 23 April 2026, on 5 June 2026.

OPERATIONAL  
EXCELLENCE

# SABODALA-MASSAWA, SENEGAL

Underground expansion underpins production growth to +350koz

## INSIGHTS

- Underground Expansion targeting the high grade Golouma and Kerekounda underground deposits is expected to supplement CIL production from FY-2027.
- During H2-2026, the first phase of the underground expansion project is expected to launch prioritising establishment works and development of the underground portal as well as development of underground exploration platforms.
- Early works at the Underground Expansion project have already commenced:
  - Dewatering of the Golouma pit has been completed and earthworks are underway to develop the in-pit ramp.
  - Power establishment to support the underground operation is approaching completion and infrastructure construction, including pumps, ventilation, offices and workshops, is underway.
  - Underground mining contractor has arrived on site and the initial underground mining fleet is in transit to site.

## Project timeline

1. Mineral Resource Estimate effective 31 December 2025. Mineral Reserve Estimate effective 31 December 2025. Mineral Resource and Reserve Estimates follow the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") Definitions Standards for Mineral Resources and Reserves and have been completed in accordance with the Standards of Disclosure for Mineral Projects as defined by National Instrument 43-101. Reported tonnage and grade figures have been rounded from raw estimates to reflect the relative accuracy of the estimate. Minor variations may occur during the addition of rounded numbers. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability

PORTFOLIO  
MANAGEMENT

# ACTIVE PORTFOLIO MANAGEMENT

An improved portfolio underpinned by high quality growth projects

## Portfolio Objectives

- › Focus management efforts on large, long-life, low-cost assets
- › Continue to optimise assets through site-level and group-wide initiatives
- › Strong focus on exploration with a class-leading exploration pipeline
- › Continuous management of the portfolio by divesting non-core assets & increasing diversification
- › Growing strategic importance of developing internal underground mining competencies

## Geographic Diversification of Production

Burkina Faso Côte d'Ivoire Senegal

## Endeavour's portfolio

1) Mine lives are based on company production forecast as at 31 December 2025 and the last available profile for divested assets. Bubble size (representing production) and AISC based on 2025 actuals for current operations and final year production for divested assets. Assafou AISC based on \$2,500/oz per DFS news release published 23 April 2026.

2) Assafou based on definitive feasibility results published in press release dated 23 April 2026.

3) 2024 Average All-In Sustaining Cost for Primary Gold Mines of \$1,457/oz sourced from S&P Global.

UNLOCKING  
EXPLORATION

# OUR EXPLORATION METHODOLOGY

12 – 15Moz of mineral resources targeted over 2026 - 2030

## GOLD MINERAL SYSTEM FRAMEWORK

Proprietary framework that provides a robust and consistent approach to target tier 1 gold deposits

### BROWNFIELD

6 – 9Moz at <\$40/oz

~50 targets

Côte d'Ivoire, Senegal, Burkina Faso

#### Target Prioritisation

##### RESOURCE QUALITY

Grade, size, metallurgical recovery aligned with operational requirements for each asset

##### PROXIMITY

Distance to existing infrastructure and processing facilities

##### TIMING

Alignment with mine plan, ore availability and reserve replacement

#### BROWNFIELD PROGRAMME OBJECTIVES

- Replace production depletion
- Extend mine lives
- Maintain or improve R&R grade

### GREENFIELD

6Moz at <\$40/oz

~30 targets

Côte d'Ivoire, Senegal, Burkina Faso

#### Target Prioritisation

##### MATURITY

Current exploration stage  
Typical development timelines

##### TECHNICAL LIKELIHOOD

Presence of a favourable mineral system  
Regional metallogeny  
Proof of mineral fertility

##### SCALE POTENTIAL

Potential mineable size mineralised systems  
Potential grade  
Clustering potential

##### PATH TO ENTRY

Partnerships vs direct acquisition

##### JURISDICTION RISK

Focus on transparent frameworks, established mining sector and infrastructure

#### GREENFIELD PROGRAMME OBJECTIVES

- Expand and diversify project pipeline
- Discover 2-3 new tier 1 greenfield deposits
- Replace Tier 1 Assafou deposit in pipeline

### NEW VENTURES

Four Tier 1 provinces

Birimian Greenstone, CAOB, Guiana Shield, West Tethyan

## PORTFOLIO OBJECTIVES

+1.5Moz

Production by 2030

**CLASS-LEADING**

All-in sustaining cost

**+10 YEARS**

Mine Life

**+20% ROCE**

Disciplined capital allocation approach

**DIVERSIFICATION**

Across multiple countries and mines

UNLOCKING  
EXPLORATION

# NEW VENTURES EXPLORATION

Expanding and diversifying our long-term portfolio

- › Our New Ventures exploration programme will help expand and diversify our portfolio to new, highly prospective tier-1 jurisdictions in the long-term. Our partnership model gives us:
  - › A disciplined, low-risk way to enter new jurisdictions, without compromising our shorter-term organic growth projects.
  - › Access to our partners' technical expertise and on-the-ground knowledge, while retaining control through board and/or technical committee representation.
- › Together with our existing West African greenfield exploration programmes, we are targeting 6Moz of discoveries across 2-3 cornerstone projects between 2026-2030

## Altair Minerals – Guyana

9.9% ownership for \$20.2m in April 2026

- › The Guiana Shield is an extension of West Africa's Birimian belt, which is a geology we are comfortable and experienced operating in.
- › Altair operates the largest consolidated exploration land package in Guyana at 590km<sup>2</sup> and is currently undertaking 75km of drilling and a 400km<sup>2</sup> Lidar survey.

## East Star Resources – Kazakhstan

Potential 80% equity earn-in for East Star JV across three phases  
15% direct ownership in East Star for \$2.5m in December 2025

- › Kazakhstan hosts some of the world's most fertile yet underexplored gold deposits, underlain by the Central Asian Orogenic Belt.
- › In Q2'26, East Star submitted permit applications covering 724km<sup>2</sup> across a highly prospective and historically underexplored land package.

## Koulou Gold – Côte d'Ivoire

19.9% ownership for \$9.9m between May 2024 and April 2026

- › The Koun-Fao and Assuéfry permits, totalling 938km<sup>2</sup>, sit adjacent to Assafo to the South and East respectively, along similar structural trends.
- › Koulou also owns the highly prospective Sakassou project, approximately 30km northwest of Perseus Mining's Yaouré mine, and the Kouto project along strike from Aurum Resources' Boundiali project.

Significant regional prospectivity

## INSIGHTS

- › Exploration discovery target of 1.0 - 1.5Moz of MI&I resources over 2026 – 2030 period at a discovery cost of less than \$40/oz.
- › 22 regional targets on Tanda-Iguela permits identified following extensive reconnaissance drilling, geophysics, soil geochemistry and geological mapping campaign.
- › FY-2026 exploration guidance of \$10m, focussed on delineating and expanding resources at several satellite targets within 10km of the Assafou deposit, including the Pala Trend 3 deposit, and the Pala Trend 2, Junction and Gbabango targets
- › Endeavour also has a strategic partnership across the Assuéfry and the Koun-Fao permits, with similar geology and structural trends to the Assafou deposit.

Q2-2026

1) The realised gold price includes the impact of the realised gains and losses on the settlement of gold collars and forward sales

# OUR COST BASE

Asset optimisations and organic growth underpin resilient cost base

## INTERNAL FACTORS IMPACTING AISC

### CONTRACTORS

Large, multi-year contracts in place, which include cost inflation clauses, and limit exposure to input cost price spikes.

### SALARIES

Stable salary structures across operations allows salary forecasting at low single digit inflation levels.

### CONSUMABLES

Multiyear contracts and secured pricing mitigate unforeseen rate hikes, and +70% procured in country, reducing freight cost and securing supply. However, price of oil derived consumables is exposed to ongoing Middle East conflict.

### DRILLING

Group level agreements delivers economies of scale.  
Long-term supplier partnerships.

~29%

~14%

~17%

~3%

## EXTERNAL FACTORS IMPACTING AISC

### ROYALTIES

Government royalty rates currently vary between 5 - 11% by country and are dependent on the underlying price of gold sales.

Sustained higher gold prices have resulted in higher royalty rates.

### FUEL & POWER

Fuel price is regulated through in-country mechanisms and pricing is periodically revised, shielding Endeavour from price spikes.

Fuel is primarily sourced from West Africa, reducing exposure to the Middle East.

For every \$1/bbl increase in the oil price, AISC is expected to increase by approximately \$1/oz. Fuel represents 5-10% of AISC.

Four out of five mines reliant on grid power with diesel backups, with the fifth mine reliant on self generation through HFO and solar power.

### FX

Approximately 65% of the AISC base is incurred in West African Francs, pegged on a fixed parity basis to the Euro, while 100% of revenues are incurred in USD. Relative USD strength improves underlying costs, while weakness increases costs.

# ADJUSTED EBITDA AND ADJUSTED EBITDA MARGIN

2) Percentage of FY-2026 cash taxes paid

# TAX PAYMENTS

## Cash income and withholding tax payment outlook

### INSIGHTS

- Income tax payments reflect the prior year's taxable earnings, while withholding tax payments reflect cash upstreaming in the current year.
- Historically, Q2 and Q3 are the highest quarters for tax payments due to the timing of income and withholding tax payments.

### H1-2026 INSIGHTS

- Taxes paid increased by \$238.4m from \$272.1m in H1-2025 to \$510.6m in H1-2026 as income tax payments increased reflecting higher taxable income at all mines during FY-2025.
- Withholding tax payments also increased reflecting the increase in cash upstreaming.

### FY-2026 OUTLOOK

- Tax payments are expected to be approximately \$660 – 770m for the full year.
- Income tax is expected to be largely stable with gold price changes, but will fluctuate with FX, unforeseen tax settlements and annual true ups.
- Withholding tax expectations, based on a \$3,000/oz gold price, will fluctuate with gold price changes, however the majority of full year withholding taxes have already been paid in Q1-2026 and Q2-2026.

Group tax payments by year ■ Minesite Tax ■ Withholding Tax

### FY-2025

### FY-2026 Guidance

# OPERATING CASH FLOW BRIDGE

Operating cash flow impacted by gold price and seasonal tax payments

## INSIGHTS

1. The realised gold price decreased by \$462/oz from \$4,810/oz in Q1-2026 to \$4,348/oz in Q2-2026.
2. Gold sold increased by 0.2koz to 278.4koz in Q2-2026.
3. Cash operating expenses increased slightly due to increased aggregate processing and mining costs, partially offset by lower royalty costs.
4. Income taxes paid increased by \$419m to \$465m due to higher withholding tax payments related to annual cash upstreaming and an increase in corporate income tax payments at all mines due to the timing of provisional income tax payments.
5. The working capital inflow increased by \$144m, driven by an increase in supplier payables, timing of gold sales proceeds and VAT refunds in Côte d'Ivoire and Senegal, partially offset by a build-up of consumable inventory at Mana and Houndé, a buildup of stockpiles at Ity and Sabodala-Massawa, and an outflow related to the timing of supplier prepayments.

## Operating cash flow bridge

1) Operating expenses and other include operating expenses, royalties, corporate costs, acquisition and restructuring, exploration costs, foreign exchange, settlement of other financial assets and liabilities, settlement of DSUs, PSUs and options and other cash expenses

# FREE CASH FLOW

Record H1-2026 free cash flow, H2 underpinned by seasonally lower cash taxes

## Free Cash Flow<sup>1</sup>

 Operating Cashflow

 Free Cashflow

 Cash used in investing activities

# \$149m

Free Cash Flow  
Q2-2026

# RECORD

Free Cash Flow  
H1-2026

1) Free Cash Flow is defined as Operating Cashflow less Investing Cashflow

# CHANGE IN NET DEBT

Healthy net cash balance sheet ahead of next organic growth phase

## INSIGHTS

1. Operating activities included \$265m in operating cashflow before changes in working capital and a \$52m working capital inflow.
2. Investing activities included \$75m of sustaining capital, \$54m of non-sustaining capital, \$25m investment in our New Venture exploration partners and \$9m of growth capital.
3. Financing activities included a net \$315m drawdown of the Group's revolving credit facility, offsetting the \$200m dividends paid to shareholders, share buybacks of \$44m, payment of financing fees of \$22m, and \$14m in payments to minority shareholders.

## Change in net cash (debt)

# NET EARNINGS

Adjusted net earnings impacted higher costs and lower realised gold prices

## INSIGHTS

1. Loss on financial instruments in Q2 included a loss of \$22m on FX movements between the Euro and USD and a \$10m loss on marketable securities. A \$2m gain on net smelter royalties and a \$1m gain on the early redemption of Senior Notes partially offset this.
2. Current income tax expense increased by \$127m in Q2, driven by an increase in recognised withholding tax expenses due to local board approvals timing for cash upstreaming, partially offset by reduced current corporate income taxes due to lower taxable profits.
3. Deferred tax recovery increased by \$234m from an expense of \$97m in Q1 to a recovery of \$137m, primarily due to the reversal of deferred tax liabilities following the local Board approval and payment of withholding taxes associated with cash upstreaming in Q2.
4. Q2 Adjustments included a \$28m loss on financial instruments, other expenses of \$21m, and a non-cash tax adjustments of \$10m related to foreign exchange on deferred tax, partially offset by a \$1 million reversal of the credit loss related to VAT.

1) This is a non-GAAP measure. Additional notes are available in Endeavour's MD&A filed on the Company's website on SEDAR and on the National Storage Mechanism.

# DEBT STRUCTURE

Significant reduction in gross debt following full repayment of RCF

## INSIGHTS

- › The Group had \$410m drawn on the Revolving Credit Facility (RCF) as at 30 June 2026. Subsequent to quarter end, Endeavour repaid the outstanding balance on its Revolving Credit Facility, reducing the Group's gross debt position.
- › Lafigué term loan had \$88m outstanding as at 30 June 2026.
- › \$500m senior notes bear interest at 7% and mature in October 2030.
- › The Group had a net cash position of \$254m at 30 June 2026, significantly below our long-term leverage target of 0.50x.

## Change in debt drawn

## Overview

The Houndé mine is one of Endeavour's cornerstone assets. The mine was built ahead of schedule and below budget, with commercial production commencing in Q4-2017.

Since then, the CIL plant has consistently performed well and is able to operate at more than 30% above nameplate capacity.

The goal is to delineate sufficient additional resources through near-mine exploration to sustain production above 250koz/year over a +10-year life of mine at an attractive AISC.

In July 2020, a mining permit was granted and mining commenced at the Kari Pump deposit, part of the Kari Area, which will provide mill feed at higher grades than the current pits.

## Overview

### KEY OPPORTUNITIES

- Greater mining flexibility with multiple available ore sources following stripping at Vindaloo and the incorporation of Kari Pump and Kari West
- Potential to integrate new discoveries and increase output through the incorporation of Vindaloo Deep, a high grade underground deposit that is expected to be added to resource in FY-2026.
- Mining fleet upgrades to improve availability

# HOUNDÉ MINE

Higher grade expected in Q4-2026 as waste stripping advances

## Q2-2026 vs Q1-2026 INSIGHTS

- Production increased due to higher tonnes milled and recovery rates.
- AISC increased driven by increased sustaining capital, primarily related to waste stripping activity at the Vindaloo Main and Kari West pits.

## FY-2026 OUTLOOK

- On track to produce between 220-255koz in FY-2026 at AISC of \$1,800-2,000/oz<sup>1</sup>.
- During H2-2026, the Vindaloo Main pit is expected to be the primary source of ore, supplemented with ore sourced from the Kari West pit. Throughput is expected to remain in-line while average grades processed are expected to decrease slightly in Q3-2026, before increasing significantly in Q4-2026 as stripping activity in the Vindaloo Main pit provides access to higher grades.

## OPTIMISATION INITIATIVES

- Blast fragmentation optimisation
- Kari Pump in-pit waste dumping
- Throughput optimisation through secondary crushing

## Production and AISC

## TARGET SCREENING

# VINDALOO DEEPS

Resource update expected in H2-2026

## INSIGHTS

- › An exploration programme of \$10.0 million is planned for FY-2026 at Houndé, of which \$1.3 million was spent in Q2-2026 consisting of over 1,800 metres of drilling.
- › The FY-2026 programme remains focused on definition of near-mine resources at the Vindaloo Deeps discovery and delineation of the Vindaloo Deeps South East target, a down-dip extension of Vindaloo Deeps.
- › The Vindaloo Deeps deposit is located less than 1km from the Houndé mine.
- › The Vindaloo Deeps deposit extends over an area 200m long and 60m wide with mineralisation starting below the Vindaloo Main life of mine pit shell.
- › During Q2, exploration activity primarily focused on finalising the definition of resources at Vindaloo Deeps with a maiden resource expected in H2-2026.
- › Resource definition drilling is underway at the Vindaloo Deeps South East target, a down-dip extension of the Vindaloo Deeps discovery, which has demonstrated continuity of the thick, high-grade mineralisation defined at Vindaloo Deeps.

### Overview

The Ity mine is one of Endeavour's cornerstone assets. It has the longest operating history of any gold mine in Côte d'Ivoire, with +1.4Moz of gold produced in its 20 plus years of operation.

The success of Endeavour's 2017 near-mine exploration programme which discovered ~3.5Moz provided the opportunity to upgrade the small-scale, short-life heap leach operation with a CIL plant.

The CIL plant was successfully built ahead of schedule and below budget, achieving commercial production in Q2-2019.

The mine has a production potential of 250koz/year over a +10-year life of mine at an attractive AISC.

### PRODUCTION AND AISC

—●— AISC (\$/oz)    □ Production (koz)

### 2025 EMISSIONS INTENSITY

kgCO<sub>2</sub>eq/oz produced

### Q2-2026 vs Q1-2026 INSIGHTS

- Production increased due to higher grades processed and higher mill throughput.
- AISC decreased primarily due to the higher volume of gold sold and lower processing unit cost driven by improved grid availability.

### FY-2026 OUTLOOK

- On track to produce between 285-330koz in FY-2026 at AISC of \$1,300-1,500/oz<sup>1</sup>.
- During H2-2026, ore is expected to be sourced from the Le Plaque, Zia, Walter, Flotouo West, Ity and Verse Ouest pits. Average grades processed are expected to increase significantly in Q4-2026, after a slight decrease in Q3, due to a higher portion of high-grade ore from the Walter pit. Throughput is expected to increase due to a softer ore blend and an increase in mill availability, while recovery rates are expected to decrease slightly.

### OPTIMISATION INITIATIVES

- Recyn optimisation
- SAG mill discharge optimisation
- Carbon and cyanide management improvement

### Production and AISC

□ Production, koz —●— AISC, US\$/oz

# GOLEU

## High priority target hosting high grade mineralisation

### INSIGHTS

- › The Goleu target is located approximately 15km south of the Ity processing plant on the wider Ity trend, and contains high grade mineralisation, continuous at depth, that was identified in early FY-2025.
- › Developing a maiden resource for the Goleu target is ongoing.

### Goleu deposit map

# GBAMPLEU

Promising target on the Toulepleu-Ity greenstone belt

## INSIGHTS

- › The Gbampleu discovery is located in the Toulepleu exploration permit (PR462), 22km south of the Ity processing plant. The prospect sits in the centre part of the Toulepleu-Ity greenstone belt, on the southern border of the Guimapleu granodioritic mole.
- › Mineralisation consists of a set of sub-parallel SW-NE shear zones moderately to steeply dipping to the NW and associated with silica-biotite-sericite alteration and a pyrite-sphalerite.
- › Drilling is focused on confirming the continuity of mineralisation at depth, where local high-grade zones of mineralisation have been identified and are believed to be associated with a large intrusion-related gold system.

## Overview

The Mana mine is located in the northern part of the highly prospective Houndé Greenstone Belt, approximately 60km north of the Houndé mine.

The mine has been in operation for over a decade, producing +2.1Moz gold.

Recent discoveries resulted in the development of the Siou underground mine, using the long-hole method, which was completed in Q1-2020.

In 2024, the Mana mine transitioned to fully underground operations across the Siou and Wona underground deposits.

kgCO<sub>2</sub>eq/oz produced

# MANA MINE

Production expected to increase in Q4-2026

## Q2-2026 vs Q1-2026 INSIGHTS

- Production decreased due to lower grades processed and lower recoveries.
- AISC primarily increased due to the lower volumes of gold sold and higher sustaining capital expenditure driven by capitalized underground development at the Wona underground deposit.

## FY-2026 OUTLOOK

- Given the lower-than-expected H1-2026 production, Mana is expected to achieve below the low-end of its FY-2026 production guidance of 155-180koz at an AISC above the top-end of the guided \$2,000-2,250/oz<sup>1</sup>.
- During Q3-2026 tonnes of ore mined and throughput are expected to be lower than Q2-2026, as mining activities in part of the Wona underground mine were paused to allow for geotechnical monitoring of a fracture identified at surface. Active ore zones are not impacted, and mining is expected to resume in mid Q3-2026. Average grades are expected to increase, reflecting higher grades mined and processed from the Wona underground mine. During Q4-2026, ore tonnes mined and processed are expected to increase, supplemented with ore from the Bana Camp open pit. Average grades milled are expected to increase due to a higher proportion of high-grade stoping ore from the Wona Underground mine. Recovery rates are expected to remain stable in H2-2026.

## OPTIMISATION INITIATIVES

- Mining productivity optimisation
- Power grid stability and underground automation

## Production and AISC

## Key performance indicators

| For The Period Ended    | Q2-2026      | Q1-2026      | Q2-2025      |

# MANA EXPLORATION OVERVIEW

Focussed on extending mine life to +10 years

| EXPLORATION TARGETING | RESOURCE APPRAISAL |
|-----------------------|--------------------|
| Bara                  | Wona Deeps UG      |
| Momina                |                    |

## TARGET SCREENING

# WONA DEEPS

Mineralisation remains open at depth below the existing underground

## INSIGHTS

- › An exploration programme of \$5.0 million is planned for FY-2026, focusing on improving resource definition and expanding resources in the Wona underground deposits.
- › Deep drilling to test the depth continuity of the Aviera zone of the Wona underground deposit has identified extensive sericite - quartz - pyrite alteration with quartz veining and some thick mineralised intercepts.
- › The grade and continuity of these intercepts will be tested with additional deep drilling in late 2026.

### Overview

The Sabodala-Massawa complex has potential to become a top tier asset with long mine life, high grade, low cost and significant exploration potential.

Existing and well-established infrastructure at Sabodala, having produced +2.5Moz since commercial production, to be upgraded and optimised for Massawa integration.

Construction of the Sabodala-Massawa expansion began in Q2-2022 with commercial production from the new 1.2Mtpa BIOX<sup>®</sup> plant declared in Q3-2024.

Development of the Sabodala-Massawa underground is expected to commence in H2-2026, with production expected from FY-2028.

# SABODALA-MASSAWA MINE

## Overview

### KEY OPPORTUNITIES

- BIOX throughput optimisation targeting +10-15%
- Exploring for new high-grade CIL ore sources on newly acquired permits and advancing underground opportunities
- In-pit tailings at the Sabodala pit
- Solar power plant successfully commissioned in Q1-2025
- Predictive maintenance programmes

### RESERVES AND RESOURCES as at 31 December 2025

### PRODUCTION AND AISC

—●— AISC (\$/oz)    □ Production (koz)

### 2025 EMISSIONS INTENSITY

kgCO<sub>2</sub>eq/oz produced

# SABODALA-MASSAWA MINE

Stable CIL performance with improved BIOX performance expected

## Q2-2026 vs Q1-2026 INSIGHTS

- › Production decreased due to lower tonnes milled and lower recovery rates.
- › AISC primarily increased due to an increase in sustaining capital, higher mining and processing unit costs.

## FY-2026 OUTLOOK

- › On track to achieve its FY-2026 guidance of 260-305koz at an AISC of \$1,350-1,550/oz<sup>1</sup>.
- › During H2, ore for the CIL plant will be primarily sourced from the Niakafiri West and Goumbati pits. Average grades processed are expected to decrease in Q3-2026, before increasing in Q4-2026 due to a higher portion of high-grade ore from the Niakafiri West and Delya South pits.
- › During H2, ore for the BIOX plant will continue to be primarily sourced from the Massawa Central Zone pit. Throughput is expected to increase due to ongoing optimisation of the processing plant. Average grades processed are expected to increase while recovery rates are expected to decrease due to an increased proportion of high-grade transitional ore from the Massawa North Zone pit in the mill feed.

## OPTIMISATION INITIATIVES

- › Mining fleet productivity optimisation
- › Underground expansion into the high-grade Golouma and Kerekounda deposits

## Key performance indicators

# SABODALA-MASSAWA MINE

Scoping underway for high-grade underground expansion

## INSIGHTS

- › Feasibility level scoping work is underway to update the Sabodala-Massawa underground mine plan.
- › Updated mine plan is expected to reflect the improved resources and reserves, and optimised timing for incorporating the Kerekounda and Golouma underground deposits into the mine plan.
- › During H2-2026, the first phase of the expansion is expected to launch, prioritising establishment works and development of the underground portal as well as development of underground exploration platforms to facilitate further exploration and definition of the unconstrained underground reserves and resources.
- › Exploration has been prioritised to delineate any mineralised extensions to the Kerekounda and Golouma deposits, with resource and reserve updates expected at year-end.

## Underground reserves and resources

# SABODALA-MASSAWA MINE

Unlocking BIOX throughput and recoveries

## INSIGHTS

### BIOX Throughput:

- › Throughput is targeting 15% above design nameplate by 2027.
- › During FY-2026, throughput and recovery rates are expected to increase due to a higher proportion of fresh ore in the mill feed, which will be partially offset by lower average grades processed to the incorporation of a small proportion of lower grade stockpiles in the mill feed.
- › SAG mill discharge and use of the pebble crusher have been optimised to debottleneck the milling circuit and improve feed stability.
- › Due to improved SAG mill stability, floatation performance has improved through consistent throughput.
- › Control upgrades and improved cyclone capacity has resulted in increased throughput.
- › Optimisation of reagents and increased utilisation are expected to continue improving gold recoveries from floatation tailings.

### BIOX Recoveries:

- › Recovery rates decreased slightly at the BIOX plant due to maintenance activities.
- › A phased gravity circuit optimisation, initially utilising surplus components from the existing CIL plant, to improve coarse gold recoveries, was completed in H1-2026.

## BIOX processing history

## Gravity circuit optimisation

# SABODALA-MASSAWA MINE

## Near term exploration focussed on adding high-grade CIL ore

## INSIGHTS

- › Following success in the FY-2024 exploration campaign at Sabodala-Massawa, the Kiesta C and Soukhoto high grade, non-refractory deposits were incorporated into the mine plan and are currently being mined.
- › During Q3-2025, interpretation of the results from the completed drilling programme at the Makana target identified two structural domains hosting mineralised lenses that will be incorporated into the ongoing resource modelling.
- › Drilling activities focussed on the Golouma West underground deposit to identify any potential extensions of mineralisation down dip.
- › Drilling at the Makana target defined a large, high-grade target with near-surface mineralisation that could provide supplemental feed for the CIL processing plant in the near-term. A resource update is expected by year-end.
- › Drilling at the Kawsara and Toma-Toya deposits has extended mineralisation towards the southwest where the deposit remains open.

# SABODALA-MASSAWA EXPLORATION OVERVIEW

Targeting near-term non-refractory and longer-term refractory deposits

## Exploration Strategy

| EXPLORATION TARGETING | RESOURCE APPRAISAL |
|-----------------------|--------------------|
| Gora                  | Kawsara            |
| Golouma               | Kerekounda         |
| Bakan                 | Soma               |
| Gora                  | Makana             |
| Mafa                  |                    |
| Khosa                 |                    |
| Sika                  |                    |
| Sira                  |                    |
| KA                    |                    |

## TARGET SCREENING

# KAWSARA

Expected to provide near-term CIL ore

## INSIGHTS

- › Kawsara is a 10km long anomaly that includes the Tama Toya and Sira targets.
- › The anomaly was drilled in Q1-2024, identifying a potentially large resource with near-surface mineralisation that is  $>1.50\text{g/t}$  and continuous over the trend.
- › Resource definition drilling continues to expand and improve confidence in the target, with a significant resource update expected in H2-2026.
- › Drilling at the Kawsara, Sira and Tama Toya deposits has extended mineralisation towards southwest where the deposit remains open.
- › Kawsara is located southwest along the Massawa structure and is located approximately 35km southeast of the Sabodala-Massawa processing plant.

# KAWSARA

Expected to provide near-term CIL ore

# KAWSARA

Expected to provide near-term CIL ore

# MAKANA

Expected to provide medium-term, high grade CIL ore

## INSIGHTS

- › The Makana deposit has the potential to provide high grade CIL ore in the nearer-term, with near-surface mineralisation.
- › The Makana deposit is located approximately 20km from the Sabodala-Massawa processing plant and is situated on trend between the Sofia and Kiesta deposits.
- › Geological drilling of the Makana target is ongoing and has extended the mineralised strike length by over 100 metres confirming the down-dip continuity of mineralisation.

# LAFIGUÉ MINE

## Overview

The Lafigué mine is Endeavour's newest cornerstone asset. It demonstrates the capabilities of the Group to unlock value through exploration and build projects on time and on budget.

The mine has a production potential of 200koz/year over a +10-year life of mine at an attractive AISC.

Lafigué was discovered for a modest exploration investment of \$31m, which represents a discovery cost of \$12/oz.

Construction began in Q4-2022 with first gold achieved in Q2-2024, one quarter ahead of schedule. A ramp-up to nameplate capacity was achieved in Q3-2024.

The Lafigué mine is proud to host a 92% national workforce and is a strong contributor to the local and domestic economy.

## Timeline

# LAFIGUÉ MINE

Throughput continues to exceed design nameplate

## Q2-2026 vs Q1-2026 INSIGHTS

- › Production decreased due to a decrease in average grades milled and recovery rates.
- › AISC decreased due to lower sustaining capital related to waste stripping, lower royalties and lower processing unit costs mainly driven by improved grid power availability.

## FY-2026 OUTLOOK

- › Given the strong H1-2026 performance, Lafigué is on track to achieve the top half of its FY-2026 production guidance of 170koz - 195koz at an AISC within the lower half of the guided \$1,600/oz - \$1,800/oz<sup>1</sup> range.
- › During the remainder of FY-2026, ore is expected to be primarily sourced from the Main pit. Pre-stripping activities are expected to commence at the next pushback at the Main and West pits in H2-2026. Throughput rates and average processed grades are expected to decrease driven by the wet season and an increased proportion of harder fresh rock in the mill feed at slightly lower grade. Recovery rates are expected to remain stable.

## OPTIMISATION INITIATIVES

- › Ore tracking
- › Crusher optimisation
- › Mill feed optimisation

## Production and AISC

## Overview

The Assafou project will become Endeavour's next cornerstone asset. It also demonstrates the capabilities of the Group to unlock value through exploration by sourcing projects organically.

Assafou was discovered in late 2021 at a low discovery cost of \$11 per indicated ounce; it ranks as one of the most significant gold discoveries in West Africa over the last decade.

The Assafou project benefits from good surrounding infrastructure, including access to the 90kV power supply within 14km of the project, and access to the A1 national road.

# ASSAFOU

Endeavour's next cornerstone asset

## INSIGHTS

### Q2-2026:

- › Procurement of long-lead items has been launched.
- › Detailed engineering and design is underway.
- › EPCM, power and earthworks tender reviews are advancing toward finalisation.
- › Development of the relocation action plan is underway to support the resettlement.

### Q3-2026:

- › Expected completion of mining convention negotiations.

### End-2026:

- › Final investment decision is targeted before the end of 2026.

## ASSAFOU PROJECT EARLY WORKS

## ASSAFOU PROJECT CONSTRUCTION

1) Critical path item

# ASSAFOU PROJECT

Endeavour's next cornerstone asset

## INSIGHTS

### Capital cost summary:

- › Upfront capital cost of \$1.1bn, with Group well positioned to continue robust shareholder returns programme through dividends and buybacks while delivering organic growth.
- › Increased upfront capital vs PFS reflects changes to site infrastructure, plant optimisation to de-risk ramp-up and to enable seamless plant expansion in the future
- › For FY-2026, guidance for growth capital investment is \$50 – 100 million, of which \$14.6 million was incurred in H1-2026.

### Operating cost summary:

- › Operating costs have been based on Q3-2025 estimates including a delivered diesel price of \$1.13 per litre and power costs at \$0.13kWh.

## ASSAFOU PROJECT UPFRONT CAPITAL COST ESTIMATE SUMMARY (-10/+15%)

|                                    | CAPITAL COSTS (\$M) |

# ASSAFOU EXPLORATION OVERVIEW

Potential to expand resource beyond the Assa Fou deposit

## Exploration Strategy

| EXPLORATION TARGETING    | RESOURCE APPRAISAL |
|--------------------------|--------------------|
| Pala Trend 1             | Pala Trend 2       |
| Pala Trend 3             | Dakoua             |
| Attrame                  | Broukro            |
| Koumenagaré              |                    |
| Gbokore-Guiende Corridor |                    |

## TARGET SCREENING

# ASSAFOU

## Resource growth expected at the Assa Fou deposit

### INSIGHTS

- › An exploration programme of \$10.0 million is planned for FY-2026 at the Assa Fou deposit, of which \$2.1m was spent in Q2 consisting of over 1,200m of drilling across 4 drill holes.
- › Drilling is focused on delineating and expanding resources at several satellite targets within 10km of the Assa Fou deposit, including the Pala Trend 3 deposit, and the Pala Trend 2, Junction and Gbabango targets.
- › Drilling is underway to test for potential Assa Fou style mineralisation within the Tarkwaian basins, as well as any continuations to the Birimian hosted mineralisation already defined at Pala 2.

# PALA TREND 2 AND 3

Near-surface mineralisation to supplement near-term production at the Assafoou project

## INSIGHTS

### PALA TREND 3

- › Maiden M&I resource of 4.7Mt @ 1.55g/t (0.2Moz Au) effective 31 Dec 2025
- › High-grade continuous oxide resources start at surface and provide mining optionality.
- › Mineralisation remains open at depth and to the northeast, further drilling planned for FY-2026.

### PALA TREND 2

- › 3km long mineralised trend defined at the larger Pala Trend 2 target.
- › Resource definition underway.
- › Drilling has successfully identified mineralisation hosted in both Birimian and Tarkwaian rock types, highlighting several additional prospective areas within the exploration package.

## INSIGHTS

- › Endeavour has strategically invested c\$10m in Koulou Gold for a 19.9% ownership stake, through three investments in May 2024, March 2025 and April 2026. Koulou Gold has four high priority projects:

### Assuéfry project

- › The Assuéfry property is located immediately East of Endeavour's Assafou project and hosts two gold in soil anomalies that are 8km and 7km long respectively, on structures that are parallel and perpendicular to the mineralising structure at Assafou.

### Sakassou project

- › The Sakassou property is located on the highly prospective Bouaflé greenstone belt nearby Perseus Mining's Yaouré mine and Endeavour's Lafigué mine. Four mineralised targets have been identified with geological mapping and drilling planned.

### Kouto project

- › The Kouto property is located on the Boundiali-Syama greenstone belt along strike from Perseus Mining's Sissingué mine and Rolute Mining's Syama mine, with a large 10x5km gold in soil anomaly identified on the property.

### Koun-Fao permits

- › On 9 February 2026, Koulou Gold acquired additional permits located immediately south of the Assafou project.

### KEY DEAL TERMS

**May 2024:** Endeavour subscribed for and purchased 9.6 million units at \$0.28 per unit for gross proceeds of \$2.7m equivalent to a 12.4% stake.

**March 2025:** Endeavour exercised its warrants and participated in a further \$2.3m funding in Koulou, increasing holding to 19.1%.

**April 2026:** Endeavour participated in a private placement, subscribing to a further 8.1 million shares (\$4.9m) in Koulou, increasing holding to 19.9%.

Under the agreement, Endeavour holds a single seat on the Board of Directors of Koulou Gold Corp.

## INSIGHTS

- On 25 October 2025, Endeavour signed a partnership-style joint venture (“Joint Venture”) with East Star Resources (LSE:EST) (“East Star”), a Kazakhstan based gold and base metals explorer, targeting tier-1 gold deposits in the Central and Northern regions of Kazakhstan.
- The Joint Venture expands and diversifies Endeavour's tier 1 pipeline, through exploration of the highly prospective and relatively underexplored Central Asian Orogenic Belt (“CAOB”).
- During Q2-2026, the JV submitted permit applications covering 724km<sup>2</sup> across a highly prospective and historically underexplored land package within the Tien Shan arc and collisional belt, which hosts more than 100Moz of gold endowment.
- Endeavour holds an equity stake of approximately 14% in East Star Resources through total investment consideration of \$2.5m.

## WHY KAZAKHSTAN?

- Kazakhstan hosts some of the world's most fertile yet underexplored gold provinces in the CAOB, with 32.1Moz gold endowment (2022 USGS estimate) and multiple million-ounce deposits.
- Early mover opportunity with limited gold exploration activity since the 1980s, and average country-wide exploration spend at <\$25m per annum<sup>1</sup>.
- Mining is a strategic sector and in December 2017 the new Mining Code created a transparent, mining and investor friendly framework, improving licence accessibility, tenure security, and regulatory clarity.

## KEY DEAL TERMS

**Phase 1:** Initial US\$5m investment over 2 years, to earn a 51% interest, funding a 2-year exploration programme to delineate potential tier 1 targets.

**Phase 2:** US\$20m investment over 3 years to earn a 70% interest, funding a 3-year exploration programme to define maiden resources

**Phase 3:** Fund and complete a preliminary feasibility study to earn an 80% interest.

East Star, which has been operating in Kazakhstan for over five years, will operate the Joint Venture leveraging its local network and expertise, while Endeavour fully funds and directs the exploration programmes and maintains controlling votes on the Joint Venture Company's Board and Technical Committees.

1) S&P Capital IQ over the last 10 years

2) Historic & competitor gold assets – Reserves and Resources (R&R) sourced from S&P Global for all assets except Kyzyl, Bestobe, and Aksu (M&I incl. Reserves), and Vasil'kovsky (P&P), which are sourced from the UCSGS 2020–2021 Minerals Yearbook: Kazakhstan and KazakGold Group Ltd., Notice of Results, 5 June 2006.

# THE KAZAKH ECONOMY

Kazakhstan is Central Asia’s largest economy. While it has long relied on energy exports, mining contributes to ~13% of industrial output. With 32Moz<sup>1</sup> of gold endowment, a modernised Mining Code, and limited exploration since the Soviet era, the country offers a stable, investor friendly framework and compelling Tier-1 discovery potential within the Central Asian Orogenic Belt (CAOB).

# THE GUIANA SHIELD

Guyana

ALTAIR MINERALS

## KEY INSIGHTS

- › Altair operates the recently consolidated Greater Oko land package, which is the largest consolidated exploration land package in Guyana at 590km<sup>2</sup>.
- › Altair's properties are located immediately adjacent to Oko West (80.3Mt at 2.10g/t for 5.4Moz M&I resources) and Oko-Ghanie (15.6Mt at 3.24g/t at 1.6Moz M&I resources) discoveries.
- › Altair commenced exploration activities in January 2026:
  - › Drilling underway at the North Peters prospect
  - › Soil and trench geochemical sampling and ground geophysics are underway at the South Oko prospect
- › On 16 July 2026, Altair announced an upsized exploration programme, comprising 75,000m of drilling, a 400km<sup>2</sup> Lidar survey in addition to trenching and geochemical soil sampling.
- › Altair and Endeavour have formed a Joint Technical Committee which will meet monthly to direct the exploration programme.
- › Endeavour's investment forms part of Endeavour's 5-year Exploration Strategy focused on replacing production depletion and adding new greenfield opportunities into the organic growth pipeline through greenfield and new ventures exploration.

## KEY DEAL TERMS

- › On 27 April 2026, Altair Minerals Limited (ASX:ALR) ("Altair") announced a strategic investment by Endeavour, via a non-brokered private placement, for 9.9% ownership, equivalent to \$20.2 million.
- › Endeavour and Altair have set up a joint technical committee and Sonia Scarselli, Executive Vice President of Exploration and Growth at Endeavour, was appointed as a Specialist Advisor to Altair Minerals' board.

## USE OF PROCEEDS:

- › Expand drilling to 50,000m, including at least 30,000m at South Oko
- › Accelerate geochemical sampling programme at the South Oko prospect
- › Launch regional exploration programme across the land package

# THE GUYANESE ECONOMY

Guyana is one of the fastest growing economies in the world with a GDP growth rate of over 10% for 2025, driven by growth in crude oil production, which commenced in 2019. Guyana is also a mining friendly jurisdiction, ranked 1st in Latin America and 10th globally for mining investment attractiveness by the Fraser Institute with a straightforward mining permitting process, transparent fiscal terms and it operates under a British parliamentary system.

# CONTINUOUS IMPROVEMENT IN ESG RATINGS

Reflecting increased transparency, disclosure and engagement

# TOWARDS NET ZERO

## INSIGHTS

- › Net Zero ambition for Scope 1 and 2 emissions by 2050
- › Medium-term target: 30% reduction in Scope 1 and 2 intensity by 2030
- › These targets are aligned with the Paris Agreement (< 2°C global warming)
- › Recent progress toward achieving long-term sustainability goals includes:
  - Completion of 37MWp solar PV plant at Sabodala-Massawa
  - Commissioning of energy-efficient infrastructure at Ity

**2026**

Emissions Intensity target of  
<600ktCO<sub>2</sub>e/oz

**2030**

30% reduction in CO<sub>2</sub>-e/oz  
emission intensities

**2050**

Net Zero ambition

## Energy Consumption and Intensity

- Total Energy Consumption (GJ)
- Energy Intensity (GJ/oz)

## Emissions and Intensity

- Scope 1+2 emissions (ktCO<sub>2</sub>-e)
- GHG Intensity (ktCO<sub>2</sub>-e/oz)

Note: Values are as reported

# ENERGY SOURCES

## SNAPSHOT OF OUR POWER SOURCES AND OPPORTUNITIES

### Senegal

#### Country Profile

- 80% Fossil, 20% Renewables (Solar, Wind, Hydro)

#### Mines & Main Power Source

- Sabodala-Massawa – HFO, Solar Power Plant
- 37 MWp solar plant added in Q1-2025 – generated 47 GWh of clean energy in 2025.

#### Power Opportunities

- Potential future grid connection from Kedougou

### Côte d'Ivoire

#### Country Profile

- Well-developed national infrastructure
- 72% Fossil (Natural Gas), 28% Hydro
- Goal to reach 46% of energy sourced from renewables by 2035

#### Mines & Main Power Sources

- Ity – 70% Grid, 30% Diesel
- Lafia – 90% Grid, 10% Diesel

### Burkina Faso

#### Country Profile

- 49% Imported, 51% National Production
- National Production: 70% Fossil, 30% Renewables (Solar, Hydro)

#### Mines & Main Power Source

- Houndé – 90% Grid, 10% Diesel
- Mana – 50% Grid, 50% Diesel

1) Country profile power composition is based off of 2024 energy draws

# WATER STEWARDSHIP

## INSIGHTS

- › Our approach is to use water as efficiently as possible
- › We pay for the water we withdraw as part of our water permits
- › Water withdrawal intensity for the Group increased to 44.3 KL/oz due to increased water withdrawal needs at Sabodala-Massawa

| Site             | Water Withdrawal |
|------------------|------------------|
| Sabodala-Massawa | 14.5 KL/oz       |
| Ity              | 9.8 KL/oz        |
| Houndé           | 10.2 KL/oz       |
| Mana             | 5.1 KL/oz        |
| Lafigué          | 4.7 KL/oz        |
| Group            | 44.3 KL/oz       |

## TARGET

2026

Recycle an average of 70% water across the Group

## Water stress index

## Water withdrawal and Intensity

# RESPONSIBLE TAILINGS MANAGEMENT

## INSIGHTS

- › Conduct regular internal and external audits, results are reported back to senior management and the Board.
- › In 2026, we established Endeavour's Independent Tailings Review Board (ITRB).
- › The ITRB has been created to provide independent technical expertise, challenge and oversight in support of our tailings governance framework
- › We support the Global Industry Standard on Tailings Management (GISTM) and are working towards alignment.
- › Annual tailings disclosure is published on our website, as part of the Investor Mining and Tailings Safety Initiative (Church of England).
- › No major environmental incidents involving cyanide in 2025.
- › All operational TSFs were audited in 2024 against the ICMC, no significant issues were raised, with the next audit planned for 2026.

## Endeavour's TSFs

# PROTECTING THE ENVIRONMENT

## INSIGHTS

- › We are committed to protecting and conserving nature and biodiversity.
- › Our Environmental policy includes a commitment to No Net Loss of Critical Habitat.
- › In 2025 we recorded no critical or major environmental incidents.
- › In 2025 we maintained ISO 45001 & ISO 14001 certification across all sites.

## TARGETS

2026

**Protect >200 hectares Group-wide & launch biodiversity initiative at Mana**

2026

**Launch “3R” plastic project at Houndé**

### Community Initiatives

- › Launched ‘1 Child, 1 Tree’ programme in 2025 with students from 10+ local schools
- › Partnered with YeS Foundation & SOEDEFOR to reforest 40 ha near Assafou Project in 2025

### Biodiversity Conservation

- › Achieved 2025 targets, with 997 ha protected and 158 ha rehabilitated
- › Early adopter of TNFD with second report published in 2025

### Towards ZERO Plastic

- › Achieved a 99% reduction in single-use plastic water bottles in 2025
- › Lafigué, Mana, Houndé have successfully eliminated plastic sachets.

# CREATING JOBS & UPSKILLING TALENT

## INSIGHTS

- › Total workforce of 14,615 including 5,381 employees & 9,234 contractors.
- › 68% of our Senior Managers are West African nationals.
- › 68 employees benefitting from our Internal Mobility Programme – 19% women and 81% nationals
- › 844 young people benefitted from valuable work experience via internships.
- › 671 employee children rewarded for academic excellence.
- › Continue to target 20% women new hires, with 16% new hire rate achieved in 2025.

## Target

**2026** Deliver second employee engagement survey EDV Voices

## Our employees, by origin

- Nationals
- Local Communities
- Expatriates

## Our senior managers

- Nationals
- Local Communities
- Regional
- Foreign

## Our workforce

- Female employees
- Female contractors
- Male employees
- Male contractors

## Manager of the Year

- › Drissa Soro, our Ivorian General Manager at Ity named 'Manager of the Year' by Confédération Générale des Entreprises de Côte d'Ivoire (CGECI).

# BOOSTING HOST ECONOMIES

## INSIGHTS

- › We prioritise in-country suppliers and the development of domestic supply chains to create employment opportunities.
- › We contribute to national economies through tax and royalty payments to host governments, as well as through investments in community development projects.
- › Since 2021, the Group has supported > 1,200 in-country suppliers:
  - › 86% spent on in-country suppliers including;
  - › 31% spending on national owned suppliers,
  - › 3% spending on local suppliers

## TARGETS

### Local Content Procurement targets:

- 80% on in-country suppliers;
- 35% from national-owned suppliers
- 3.5% minimum from local suppliers

## FY-2025 Procurement budget

## FY-2025 Payments to governments

## Economic contribution to host countries

### Local Content Accelerator

- › We launched, with the Federation of Chambers of Mines, the Local Content Accelerator to support a competitive, inclusive, resilient mining value chain

# COMMUNITY ENGAGEMENT

## INSIGHTS

- › 2,321 community consultations held during 2025
- › Range of income-generating activities in place, with a focus on the youth and women
- › 226 grievances received in 2025, a decrease of 12% compared to the 256 received in 2024, largely due to issues regarding crop flooding, dust impact, local recruitment, youth employment and suppliers.
- › Assessed all 2025 livelihood restoration programmes to evaluate impact and effectiveness, with recommendations to inform a new 2026 strategy, aided by external consultants.

## Artisanal & small-scale gold mining (ASGM)

- › ASGM present across all our sites
- › Each ASGM site has a different local context, so a 'one size fits all' approach is not suitable
- › ASGM range from local people to migrants, along with a rise in mechanisation
- › In 2021, we developed a 5-point ASGM management plan to help develop inclusive solutions, track actions and manage stakeholders

## Case study

### Legal Identity: a gateway to opportunity

This initiative addresses the lack of civil documentation, a barrier preventing children and adults in host communities from accessing education and essential public services. Through our Endeavour Foundation we support the issuance of birth certificates, helping to restore legal identity and removing barriers to education, employment and social inclusion.

In 2025, the Foundation partnered with the Association of Women Jurists of Côte d'Ivoire to issue 600 birth certificates for disadvantaged children near the Ity, Lafigué and Tanda sites. Around the Houndé mine in Burkina Faso, the Foundation also supported the issuance of 500 birth certificates, including 200 for adults.

# EDUCATION

## INSIGHTS

- › Education is a key priority for Endeavour, unlocking socio-economic opportunities for members of our host communities.
- › The Foundation implements regional, national and cross-border education initiatives in partnership with organisations and local authorities.
- › To date, we have reached thousands of community members at all stages of learning.

# TARGETING ZERO HARM

## INSIGHTS

- › Reported 0.07 LTIFR, well below industry benchmark.
- › 40,000 people reached through malaria programmes, including a 77% reduction in workforce malaria cases since 2021
- › \$0.5 million invested in local community health projects in 2025 near our mines
- › 5,472 local women and children received free medical care during 2025
- › During Q2-2026, Endeavour was saddened to report that a contractor colleague passed away at Lafigué. A full investigation has been completed with several key learnings.
- › We have mandated refresher courses for all frontline supervisors and a supervisor capability programme
- › Endeavour is engaging in a comprehensive risk and safety assessment, led by an external consultant, to ensure best practice across all our sites.

## Lost time injury frequency (LTIFR)

LTIFR is calculated as number of LTIs and Fatalities in the Period X 1,000,000 / (Total people hours worked for the period)

## Malaria incidence rate

Malaria Incidence Rate is calculated as the number of malaria cases per 1,000 people, in-line with WHO best practice

## Targets

- 2026** Target malaria incidence rate of 161/1,000 per employee
- 2026** Launch 4P Ambassador Programme, further championing zero harm

## On-site Training

- › In 2025, our workforce completed 430,212 hours of paid workplace training

# DIVERSITY AND INCLUSION

## INSIGHTS

- › Employment of women in mining in West Africa remains relatively new, predominantly due to historical perceptions of the industry and cultural traditions.
- › We are addressing this bias by actively promoting gender equality and empowering our female talent at Endeavour.
- › Key Stats:
  - 44% women on Endeavour's Board
  - 30% women on the Executive Committee
  - 35% women directly report to Executive Committee
  - 27% women in Technical/Supervisor roles

## Targets

- 2026** Bring our 4P values to life implementation of the 4P Ambassador Programme
- 2026** Design and deploy new technical training to support critical capability building

## Female representation at Endeavour

# ETHICAL BUSINESS

## INSIGHTS

- › Zero substantiated reports of bribery, corruption, human rights or modern slavery
- › Set out Group's 3-year human rights roadmap
- › Achieved RGMP compliance across all our sites and corporate
- › Became Full Member of the VPSHR in Q1 2025
- › Formal supporter of EITI

## TARGETS

**2026**

Implement VPSHR compliance audit at Lafigué and Sabodala-Massawa mines

**2026**

Achieve ISO 28000 certification

### Human Rights

- › Our Human Rights Policy is reviewed annually, and we publish an annual Modern Slavery statement
- › Any human rights-related grievances are reported quarterly to the Board

### Anti-Bribery/Corruption

- › Independent 3<sup>rd</sup> party 24/7 whistleblower hotline
- › Due diligence is conducted on all suppliers
- › Any reported breaches investigated by compliance and reported to Audit Chair

### Responsible Sourcing

- › Gold is refined by MKS PAMP, certified member of the LBMA, and RJC
- › Single Mine Origin (SMO) initiative continues to grow, helped by global publicity from the Met Gala in New York

1) Measured as Females and Ethnic Minorities as a percentage of total size of board

# WEST AFRICA INSIGHTS

5

## WEST AFRICA'S COMPETITIVE ADVANTAGE

Endeavour is strategically positioned with an unmatched competitive advantage in the region.

West Africa has become the largest gold producing region globally due to its significant exploration potential, favourable mining regimes, and the industry's ability to build mines on time, on schedule and with low capital intensity.

EXPLORATION

Historically underexplored region; top region for gold discoveries over the last 15 years

PERMITTING

Amongst the quickest permitting timelines globally as countries seek to attract investment

CONSTRUCTION

Low capital intensity with industry-wide track record of delivering projects quickly, on time and on-budget

PRODUCTION

One of the largest gold producing regions globally with all major gold miners operating in the region

STABLE  
JURISDICTION

Stability through the West African Monetary Union, shared currency and aligned laws, regulations and mining codes

## DISCOVERIES BY AREA

For the period between 2010-2024

## WEST AFRICA RANKS 1ST FOR DISCOVERIES

The region is significantly under-explored compared to other regions.

**+70**  
Moz

Discovered since 2010

# ENDEAVOUR HOLDS ONE OF THE LARGEST LAND TENEMENT HOLDINGS IN WEST AFRICA

**60%** of greenstone belt lies in Burkina Faso and Côte d'Ivoire but...

...only represents **~30%** of production since it is underexplored

**Endeavour has the largest land package across the  
Birimian Greenstone Belt**

# WEST AFRICA<sup>1</sup> IS THE 4TH LARGEST EXPLORATION FOCUS ACROSS THE GLOBE

Given that exploration spend often foreshadows future production growth, West Africa has the potential to be an even larger producing region.

8.9%

of global budget  
spent in  
West Africa

Source: S&P Global Intelligence

1) West Africa includes Burkina Faso, Côte d'Ivoire, Ghana, Guinea, Liberia, Mali, Mauritania, Nigeria and Senegal

# WEST AFRICA IS THE FASTEST JURISDICTION TO BUILD A MINE

Given the importance of mining to West African economies, administrations are supportive of the extractive industries and focussed on streamlining the permitting and construction process.

**+22**

Gold mines built in  
French West Africa  
since 1990

## DISCOVERY TO PRODUCTION FOR GOLD MINES

Average lead time to production since 1990

## GOLD PROJECT CONSTRUCTIONS

Based on 44 primary gold projects built since 2010

 Project built on time & schedule  
 Project missed budget or schedule

## WEST AFRICAN PROJECTS ARE BUILT QUICKER, ON-TIME AND ON-BUDGET

West Africa is a highly favourable region to build gold projects due to:

- › Supportive local communities
- › Established stable, clear and timely permitting processes
- › Availability of high-quality engineering firms with a proven track record of building mines on time and on budget

## GOLD PROJECT CAPITAL INTENSITY

Capital intensity calculated as development capital costs divided by M&I Resource as per the feasibility study

## WEST AFRICAN PROJECTS HAVE LOW CAPITAL INTENSITY

West African projects have the lowest capital intensity of any region due to:

- › High quality of projects
- › Significant resource potential
- › Reduced inflationary impacts given large labour markets
- › Flat topography and favourable weather
- › Good power and transport infrastructure
- › Large skilled workforce and numerous established mining service providers in the region

# WEST AFRICA IS THE FASTEST- GROWING GOLD PRODUCING REGION

1) Only applies to new projects, Ity and Lafigué are stabilised under the existing conventions

2) New mining code will only be applicable at the renewal of the mining code (Mama -2027 and Houndé – 2029). Increased free-carried interest from 10% to 15% adopted May 2025.

3) Not government mandated. Optionally paid to the local community by Endeavour to align best practices across operating entities.

4) Burkina Faso royalty rates below \$1,500/oz are: 3% up to \$1,000/oz, 4% between \$1,000-1,300/oz and 5% from \$1,300-1,500/oz. Burkina Faso royalty rate will increase by 1% for each \$500/oz increment above \$3,000/oz.

5) Royalty rates in Côte d'Ivoire increased from 6% to 8% in December 2025, with the change retroactively applied from Q1-2025. The incremental cost has been applied to other expenses in FY-2025, with the incremental costs applied to royalty expenses from FY-2026.

# ENHANCED SECURITY PLATFORM DUE TO SCALE IN THE REGION

- › Security unit structured as a business unit, led by ex-French military
- › Air strips on sites to avoid use of roads and improve operating efficiencies
- › Strong relationship with in-country security forces including:
  - › Government
  - › Military
  - › Security squad allocated to Endeavour

SENEGAL

# THE SENEGALESE ECONOMY

Senegal, has a reputation as one of the most stable countries in Africa, historically dependent on agriculture, the growing natural resources sector, with offshore natural gas discoveries advancing towards production, is expected to support significant economic growth.

# THE IVORIAN ECONOMY

Côte d'Ivoire's economy, traditionally driven by agriculture, is diversifying through growth in natural resources. Gold is now its second-largest export, and longstanding offshore oil and gas production has made it an energy exporter, reinforcing its role as a stable economic hub in West Africa.

# THE BURKINABE ECONOMY

Endeavour is one of Burkina Faso’s largest private employers and a leading gold producer, operating two gold mines and holding the largest exploration portfolio. Strong ties with government underpin its long-term success in country.

| Paul Blackney, MAusIMM, MAIG    | Principal Consultant, Datamine Australia Pty. Ltd. (Snowden Optiro) | Kalana Project (Kalana and Kalanako)                                                                                                                                                                                                                                                                            |

## MINERAL RESERVES

| QUALIFIED PERSON                 | POSITION                                                                 | PROPERTY/DEPOSIT                             |
|----------------------------------|--------------------------------------------------------------------------|----------------------------------------------|
| Salih Ramazan, FAusIMM           | Vice President, Mine Planning, Endeavour Mining plc                      | Ity, Houndé, Sabodala-Massawa (OP), Lafigué  |
| Petre Florea, PR. Eng.           | Mine Planning Manager, Operations and ESG.                               | Mana (Wona-Kona UG, Siou UG)                 |
| Francois Taljaard, SAImm, Pr.Eng | Principal Consultant (Mining Engineering), SRK (UK)                      | Assafou-Dibibango Project                    |
| Cameron Rees, FAusIMM            | Director and Principal Mining Engineer - CCR Mining Engineering Pty Ltd. | Sabodala-Massawa (Golouma and Kerekounda UG) |
| Allan Earl, FAusIMM              | Executive Consultant, Datamine Australia Pty. Ltd. (Snowden Optiro)      | Kalana Project                               |

- The mineral resources and mineral reserves have been estimated and reported in accordance with Canadian National Instrument 43-101, 'Standards of Disclosure for Mineral Projects' and the CIM Definition Standards adopted by CIM Council on 10 May 2014, as well as the CIM Estimation of Mineral Resources & Mineral Reserves Best Practice Guidelines as also adopted on 29 November 2019.
- Mineral resources that are not mineral reserves do not have demonstrated economic viability.
- All mineral resources are reported inclusive of mineral reserves.
- Tonnages are rounded to the nearest 100,000 tonnes; gold grades are rounded to two decimal places; ounces are rounded to the nearest 1,000oz. Rounding may result in apparent differences between tonnes, grade and contained metal.
- Tonnes and grade measurements are in metric units; contained gold is in troy ounces.
- Processing recoveries vary and are a function of many factors including: pit material types, mineralogy and chemistry of the ore. The overall average recoveries are around 89% at Sabodala, 90% at Houndé, 87% at Ity, 88% at Mana, and 95% at Lafigué. The average processing recoveries at the development projects is Kalana at 90% and Assafou at 90%.
- The Assafou project is currently 100% owned. Ownership (and attributable Mineral Resource and Mineral Reserves) will change to reflect the Government of Côte d'Ivoire's minority interest ownership after the project company is incorporated for the exploitation phase with State participation in accordance with Cote d'Ivoire law.
- The reporting of mineral reserves and resources are based on a gold price as detailed below:

| Au price \$/oz                | 2025 Reserve | 2024 Reserve | 2025 Resource | 2024 Resource |
|-------------------------------|--------------|--------------|---------------|---------------|
| Houndé                        | 1,900        | 1,500        | 2,100         | 1,900         |
| Ity <sup>1</sup>              | 1,900        | 1,500        | 2,100         | 1,900         |
| Mana                          | 1,900        | 1,500        | 2,100         | 1,900         |
| Sabodala-Massawa <sup>2</sup> | 1,900        | 1,500        | 2,100         | 1,900         |
| Lafigué                       | 1,900        | 1,500        | 2,100         | 1,900         |
| Kalana <sup>2</sup>           | 1,900        | 1,500        | 1,900         | 1,500         |
| Assafou project               | 1,500        | 1,500        | 1,900         | 1,900         |

<sup>1</sup>Reserves have been optimised at a gold price of \$1,500/oz with cut-off grades and cash flow generated at a gold price of \$1,900/oz. <sup>2</sup>Reserves have been optimised at a gold price and cut-off grades of \$1,500/oz with cash flow generated at a gold price of \$1,900/oz.

Cut-off grades for the Mineral Resources are as follows:

- Houndé: at 0.40g/t Au
- Ity: at 0.40g/t Au
- Sabodala-Massawa: open pit from 0.40g/t to 1.00g/t Au. Underground from 2.00g/t to 2.20g/t Au (\$1,900 Basis)
- Mana UG: 1.8g/t Au for Siou and 2.0 g/t Au at Wona;
- Lafigué: all 0.40g/t Au
- Kalana: all 0.50/t Au, 0.0g/t Au for TSF
- Bantou: from 0.43g/t Au to 0.86g/t Au
- Nabanga: at 3.00g/t Au
- Assafou: at 0.40 g/t Au

Cut-off grades for the Mineral Reserves are as follows:

- Houndé: Oxide and Transitional 0.4 to 0.7; Fresh: 0.5 to 0.6 except Mambo 1.0:
- ITY: Oxide: 0.4, Transitional and Fresh: 0.4 to 0.6
- SGO SWOLP: Oxide: 0.5 to 0.8, Transitional: 0.6 to 1.0, Fresh: 0.6 to 0.8
- SGO SSTP: Transitional (RedTrans): CZ: 1.7, NZ: 1.4, Delya (Main & South): 1.0, Samina: 1.1
- SGO SSTP: Fresh (all): 1.3
- SGO UG: Golouma: 2.8, and Kerekounda: 2.6 (\$1,500 Basis)
- Lafigué: All weathering types: 0.4
- Mana: Siou North: 2.80, Siou South: 2.90, Wona: 2.60
- Kalana and Kalanako OP: oxide: 0.40 g/t Au; transitional: 0.5 g/t Au; fresh: 0.60 g/t Au, 0.0 g/t Au for TSF ; and
- ADP: laterite/oxide/transitional: 0.40 g/t Au; fresh: 0.50 g/t Au

# EXPLORATION TARGET METHODOLOGY

## Target screening to support operations and deliver tier 1 projects into the pipeline

Endeavour's large land position of more than 7,000km<sup>2</sup> and comprehensive database over a very large number of exploration targets promotes the application of a general portfolio management theory where all exploration targets are evaluated and risked, based on their development stage and probability of success which is, defined as the potential to achieve Endeavour's target criteria.

### Brownfields Exploration Methodology:

**Step 1:** Technical screening of the brownfield exploration portfolio based on four key criteria; Gold Mineral System Framework, resource quality, proximity to a processing facility and timing, to define an unrisked discovery target. The first round of screening evaluates the mine's requirements and identifies opportunities based on the resource quality, proximity to existing processing facilities and timeline to production, evaluating over 50 targets within the Group's brownfield portfolio.

- › **Gold Mineral System Framework:** The Gold Mineral System framework is a proprietary framework that provides a consistent approach to targeting tier 1 gold deposits. The Framework analyses the genetic elements required to create a tier 1 gold deposit, at various scales and characterises the various proxies that define these genetic elements allowing large volumes of data to be screened for tier 1 gold deposits potential. This consistent approach supports systematic prioritisation and targeting at various scales from district scale to deposit scale.
- › **Resource Quality:** To determine resource quality all available geological data including geological maps, cross sections, structural data, surface geology, geochemistry, geophysics, regolith mapping, alteration profiles, drilling data, cores, analysis of artisanal mining activity, outcrops, and other survey data are incorporated to determine the potential grade, size and metallurgical affinity to the respective processing plant to evaluate the targets.
- › **Proximity:** Target locations are evaluated based on the distance to existing infrastructure and the nearest processing facility. This criterion is reviewed in conjunction with resource quality.
- › **Timing:** Timeline to develop the targets is evaluated based on the requirements of the proximal mine, and the outlook for the mine plan at the mine and across the group.

**Step 2:** Evaluation of all available geological data to determine indicative target grade and size, which is risked based on development stage.

Evaluation of geological data and target characteristics including the physical parameters such as length, width, thickness, density, grade characterising are used to determine potential target grade and expected resource size. Resource size is then risked based on the development stage of the target, using risking of 0.05 – 0.2x at the target definition phase, 0.2 – 0.7x at the target testing and delineation phase and 0.7 – 1.0x at the resource appraisal stage

**Brownfield Programme Objectives:** The brownfield exploration programme is focussed on replacing production depletion across the operating portfolio and extending mine lives by adding resources at similar or higher grade than the existing resource base at each asset.

### Greenfield Exploration Methodology:

Defining the search area: tier 1 gold provinces with high prospectivity and low exploration maturity, defined by the presence of tier 1 gold deposits and the amount of modern, systematic exploration that has been undertaken. The three criteria that are used to evaluate these provinces are the Gold Mineral System Framework, path to entry and jurisdiction risk.

- › **Gold Mineral System Framework:** The Gold Mineral System framework is a proprietary framework that provides a consistent approach to targeting tier 1 gold deposits. The Framework analyses the genetic elements required to create a tier 1 gold deposit, at various scales and characterises the various proxies that define these genetic elements allowing large volumes of data to be screened for tier 1 gold deposits potential. This consistent approach supports systematic prioritisation and targeting at various scales from district scale to deposit scale.
- › **Path to Entry:** The ability for Endeavour to gain exposure to preferred tenure through direct ownership or through partnerships with local operators.
- › **Jurisdiction Risk:** Jurisdictions are evaluated based on the state of the mining sector and current mining frameworks and their transparency. Access and infrastructure are also economic considerations.

Once identified, greenfield targets are subsequently prioritised based on maturity, technical likelihood and scale potential.

- › **Maturity** evaluates the current development stage of the target and the expected development timeline.
- › **Technical Likelihood** reviews the mineral system, its fertility and the metallogeny of the surrounding region.
- › **Scale Potential** evaluates the size and quality of the system against other systems in the region to determine the likelihood of the target meeting the Group's target criteria.

**Greenfield Programme Objectives:** The greenfield exploration programme is focussed on discovering 2 to 3 potential tier 1 greenfield projects over the 2026 – 2030 period in order to expand and diversify the organic growth pipeline, providing projects within the four defined tier 1 gold provinces that can be developed following the completion of the Assafou project.
